

THE ACDDR

It's a busy time for the ACDDR.....

Recruitment numbers

	Samples	Trio Families
New South Wales	799	254
Queensland	1079	341
Victoria 1	264	85
Victoria 2	405	130
Western Australia	868	254

News

TIDGC

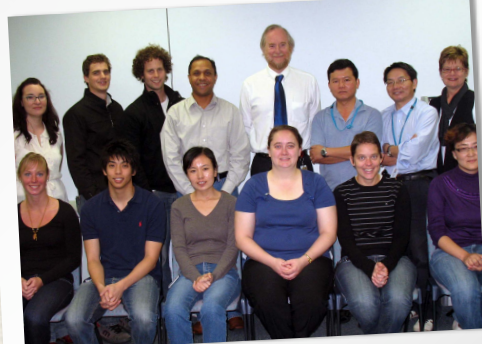

The ACDDR has recently been involved in a United States-based global collaboration - the Type 1 Diabetes Genetics Consortium. With permission from the Investigators, samples collected as part of the ACDDR have been sent to the United Kingdom for inclusion in another study into diabetes.

REPORTS

Every year, the Centre for Diabetes Research produces an annual report for funding bodies to show our progress. As part of the Centre, the ACDDR is able to showcase how we are reaching our recruitment goals and our future directions. This is also reflected in our Annual NHMRC Report which was submitted in March.

WEBSITE

The ACDDR website has current information on the progress of the Repository and any relevant news items. Please feel free to forward any news from your clinics for us to include on the website.

THE CENTRE FOR DIABETES RESEARCH GANG AT WAIMR

NEW MEMBERS

We have several new arrivals at the ACDDR. Lyn Barnes is the new Study Co-ordinator at Monash Medical Centre in Melbourne to replace Yoke Wong. We wish Lyn all the best in establishing herself in this role.

Our new laboratory staff member is Fred Ong.

Fred has come to us from the University of Western Australia after a science degree and is working tirelessly to extract DNA from the saliva kits.

LABORATORY

We are currently working on a list of samples we need to recall. After extracting, genotyping successfully, we need to produce more of the sample through Whole Genome Amplification. Unfortunately, in some cases, we need more of the original sample. Please stay tuned...

If you have any problems, questions or successes, please give me a bell.

Sarah
